

## SOME HERBACEOUS PLANTS LESS LIKELY TO BE EATEN BY SLUGS AND SNAILS

Acanthus mollis (bear's breeches)	Heuchera
Aconites	Iberis sempervivum
Achillea filipendulina	Knautia
Agastache	Liatris spicata (gayfeather)
Agapanthus hybrids and cultivars	Lysimachia punctata
Alchemilla mollis (lady's mantle)	Myosotis species (forget-me-not)
Anemone × hybrida (Japanese anemone)	Nepeta × faassenii (catmint)
Anemone hupehensis (Japanese anemone)	Ornamental grasses and sedges
Antirrhinum majus (snapdragon)	Papaver nudicaule (Iceland poppy)
Aquilegia species	Papaver orientale (oriental poppy)
Armeria species	Pelargonium
Aster × frikartii (Michaelmas daisies)	Penstemmon
Aster amellus	Phlox paniculata
Aster novae-angliae	Physostegia virginiana (obedient plant)
Astilbe × arendsii	Polemonium foliosissimum
Astrantia major	Polygonum species
Bergenia (elephant's ears)	Potentilla hybrids and cultivars
Buddleia	Pulmonaria species (lungwort)
Centaurea dealbata and C. montana	Ranunculaceae
Campanula	Rudbeckia fulgida
Convolvulus	Salvia × superba
Corydalis lutea	Saponaria
Cynara cardunculus (globe artichoke)	Saxifraga × urbium (London pride)
Dicentra spectabilis (bleeding heart)	Scabiosa caucasica (scabious)
Digitalis purpurea (foxglove)	Sedum spectabile (ice plant)
Eryngium species	Sempervivum species (houseleeks)
Euphorbia species (spurges)	Sidalcea
Filipendula	Sisyrinchium species
Foeniculum vulgare (fennel)	Solidago species (golden rod)
Fuchsia cultivars	Stachys macrantha
Gaillardia aristata	Tanacetum coccineum (pyrethrum)
Geranium species	Thalictrum aquilegifolium
Geum chiloense	Tradescantia virginiana
Helianthemum	Tropaeolum species (nasturtium)
Hellebores	Verbascum species (mullein)
Hemerocallis cultivars (day lilies)	Vinca

In addition it seems that plants with leaves that have a strong smell are also disliked i.e. Scented Leaved Pelargoniums, Rosemary, Bay
